# SoundScribe

**SoundScribe** is the voice recording complex system, developed by EDS Systems OÜ, that allows to record from any source of a sound (the phone, the mobile phone, radio).

Access to the information - is extremely necessary for you? It is not problem for you to think of. Work time is too valuable to spend it searching for call records. SoundScribe System will provide you the access to records of conversations in a few clicks of the mouse. Who called? When? For how long? All this information is accessible. With SoundScribe all data is saved in the digital form. All conversations are registered automatically. Time, date, duration, numbers are quite accessible parameters, depending on a configuration of system.

The device is based on componental architecture and can be optimized to suit the customer wishes as much as possible.

SoundScribe System possibilities:

- records from up to eight channals at one time
- records can be made from phone, mobile phone, radio (from any source of a sound)
- automatic start of the recording
- adjustable sound quality/kompression ratio
- automatic delete of the old files
- records are saved as usual WAV file, that can be opened on any computer
- possibility to access archive from the web
- the dialled number will be saved

# **E EDS** SYSTEMS

SoundScribe system units:

### **Communication Unit**

- 1 Telephone port adapter
- 2 Radio port adapter

# **Recording Unit**

- 1 Main Unit
- 2 License (per port)

### **Listening Client**

1 Per installation fee

### **GSM** option

1 GSM unit (also telephone port adapter is required)

## Storage space

- 1 20 GB
- 2 40 GB
- 3 60 GB
- 4 80 GB
- 5 120 GB
- 6 160 GB

### **Backup option**

- 1 HDD backup (also additional storage space is required)
- 2 DAT backup (can be combined with HDD backup)
- 3 CDRW backup

Audio file size for "always online" record mode from one port:

- 1 KB per second
- 60 KB per minute
- 3.5 MB per hour
- 84 MB per day
- 2.5 GB per month
- 30 GB per year
